RD AAOW Free development lab's Applications development policy

[RD AAOW Free development lab's](#) Applications development policy (RD AAOW FDL ADP) `rev. 11`

Contents

Introduction

This Policy (ADP), its positions, conclusion, end-user license agreement and application order are describing general rules that we follow in all development processes, released projects and implemented ideas.

It must be acquainted by participants and users before using any of Laboratory's products. By downloading them, you completely agree to this Policy and accept it!

Clauses of the Policy

Points `1`, `2`, `3`, `4`, `5` and `8` (marked with a ⚠️ sign) are ***mandatory***.

Points `6` and `7` (marked with a ✅ sign) are ***advisory***.

1. We work on free base

⚠️ No apparent or hidden payments are provided for Lab developments. If some products are using libraries with partially-free licenses, it is declared in annotations of corresponding projects.

2. We don't use ads

⚠️ Lab developments have no advertisement elements except of links to other own projects. All links can only be called by user and have no automatic triggers.

3. We don't use autoupdate

⚠️ None of Lab products will update their functionality without direct involvement of user. Only user can initiate this process. Non-executable content may be updated automatically if an absence of it makes impossible the correct functioning of the product.

4. We don't use hidden functionality

⚠️ Lab products have no code with undeclared aims (uncontrollable updating, data collecting, downloading of extraneous content). All functions of products are described in user manuals and / or their annotations.

5. We don't collect personal data

⚠️ Lab applications have no algorithms for gathering / accumulating / sending of private info. All data used by utilities doesn't leave user's device.

6. Our products are open-source

✅ All code that has no special limitations is open for all use cases except removing license text and, as a result, depersonalization of ideas presented in it.

7. We welcome recommendations and bug reports

✅ Your comments, reports, advices and wishes allow Laboratory to improve created products. It is the only way to know what Laboratory needs to be better.

8. We don't leave our users

⚠️ All products of Laboratory have developers support. All users can ask for help when using Lab projects.

Conclusion

Clauses of the Policy derive one from another and guarantee that:

- The Lab will not include payments, ads, hidden and / or unexpected functionality, uncontrollable updates, de-anonymizing algorithms and other elements that aren't compatible with this Policy.
- The Lab welcomes cooperation with users offering assistance or requiring assistance in the development / maintenance processes of the main and / or child Lab products.

End user license agreement

Our products and any updates are being delivered «as is». ***Laboratory*** may try to, but ***does not and cannot warrant*** the performance, results, absence of crushes and / or data losses you may obtain by using them. ***All products are used at your own risk***, without any guarantees and compensations, explicit and implied (except described above). There is no liability on the part of Laboratory.

Application order

1. Acquaintance with a Policy is mandatory. Failure to become acquainted with the Policy doesn't deprive the Laboratory administration of the right to apply it.
2. Agreement with the Policy is not required for participation in any community / channel / hosting managed by the Laboratory.
3. Disagreement with the Policy is not the basis for any sanctions against a member of the community / channel / hosting.
4. Publication of developments / products / materials / other elements that aren't consistent with the Policy in materials / comments / feeds of any community / channel / hosting managed by the Laboratory may be limited or terminated at decision of the administration.
